## License Agreement

Permission is hereby granted by the Open Geospatial Consortium, ("Licensor"), free of charge and subject to the terms set forth below, to any person obtaining a copy of this Intellectual Property and any associated documentation, to deal in the Intellectual Property without restriction (except as set forth below), including without limitation the rights to implement, use, copy, modify, merge, publish, distribute, and/or sublicense copies of the Intellectual Property, and to permit persons to whom the Intellectual Property is furnished to do so, provided that all copyright notices on the intellectual property are retained intact and that each person to whom the Intellectual Property is furnished agrees to the terms of this Agreement.

If you modify the Intellectual Property, all copies of the modified Intellectual Property must include, in addition to the above copyright notice, a notice that the Intellectual Property includes modifications that have not been approved or adopted by LICENSOR.

THIS LICENSE IS A COPYRIGHT LICENSE ONLY, AND DOES NOT CONVEY ANY RIGHTS UNDER ANY PATENTS THAT MAY BE IN FORCE ANYWHERE IN THE WORLD.

THE INTELLECTUAL PROPERTY IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND NONINFRINGEMENT OF THIRD PARTY RIGHTS. THE COPYRIGHT HOLDER OR HOLDERS INCLUDED IN THIS NOTICE DO NOT WARRANT THAT THE FUNCTIONS CONTAINED IN THE INTELLECTUAL PROPERTY WILL MEET YOUR REQUIREMENTS OR THAT THE OPERATION OF THE INTELLECTUAL PROPERTY WILL BE UNINTERRUPTED OR ERROR FREE. ANY USE OF THE INTELLECTUAL PROPERTY SHALL BE MADE ENTIRELY AT THE USER'S OWN RISK. IN NO EVENT SHALL THE COPYRIGHT HOLDER OR ANY CONTRIBUTOR OF INTELLECTUAL PROPERTY RIGHTS TO THE INTELLECTUAL PROPERTY BE LIABLE FOR ANY CLAIM, OR ANY DIRECT, SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES, OR ANY DAMAGES WHATSOEVER RESULTING FROM ANY ALLEGED INFRINGEMENT OR ANY LOSS OF USE, DATA OR PROFITS, WHETHER IN AN ACTION OF CONTRACT, NEGLIGENCE OR UNDER ANY OTHER LEGAL THEORY, ARISING OUT OF OR IN CONNECTION WITH THE IMPLEMENTATION, USE, COMMERCIALIZATION OR PERFORMANCE OF THIS INTELLECTUAL PROPERTY.

This license is effective until terminated. You may terminate it at any time by destroying the Intellectual Property together with all copies in any form. The license will also terminate if you fail to comply with any term or condition of this Agreement. Except as provided in the following sentence, no such termination of this license shall require the termination of any third party end-user sublicense to the Intellectual Property which is in force as of the date of notice of such termination. In addition, should the Intellectual Property, or the operation of the Intellectual Property, infringe, or in LICENSOR's sole opinion be likely to infringe, any patent, copyright, trademark or other right of a third party, you agree that LICENSOR, in its sole discretion, may terminate this license without any compensation or liability to you, your licensees or any other party. You agree upon termination of any kind to destroy or cause to be destroyed the Intellectual Property together with all copies in any form, whether held by you or by any third party.

Except as contained in this notice, the name of LICENSOR or of any other holder of a copyright in all or part of the Intellectual Property shall not be used in advertising or otherwise to promote the sale, use or other dealings in this Intellectual Property without prior written authorization of LICENSOR or such copyright holder. LICENSOR is and shall at all times be the sole entity that may authorize

you or any third party to use certification marks, trademarks or other special designations to indicate compliance with any LICENSOR standards or specifications. This Agreement is governed by the laws of the Commonwealth of Massachusetts. The application to this Agreement of the United Nations Convention on Contracts for the International Sale of Goods is hereby expressly excluded. In the event any provision of this Agreement shall be deemed unenforceable, void or invalid, such provision shall be modified so as to make it valid and enforceable, and as so modified the entire Agreement shall remain in full force and effect. No decision, action or inaction by LICENSOR shall be construed to be a waiver of any rights or remedies available to it.

## **i. Abstract**

This OGC Best Practice, a volume of the CDB document set, provides a list and description of the instance-level attribution fields held in Navigation Dataset Instance Attribute files. Please refer to section 3.7 of the CDB Core Standard (Volume 1) for information on the tables that use the Navaids key words.

## **ii. Keywords**

The following are keywords to be used by search engines and document catalogues.

ogcdoc, OGC document, ogcdoc, cdb, navaids

## **iii. Preface**

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. The Open Geospatial Consortium shall not be held responsible for identifying any or all such patent rights.

Recipients of this document are requested to submit, with their comments, notification of any relevant patent claims or other intellectual property rights of which they may be aware that might be infringed by any implementation of the standard set forth in this document, and to provide supporting documentation.

## **iv. Submitting organizations**

The following organizations submitted this Document to the Open Geospatial Consortium (OGC):

Organization name(s)

- CAE Inc.
- Carl Reed, OGC Individual Member
- Envitia, Ltd
- Glen Johnson, OGC Individual Member
- KaDSci, LLC
- Laval University
- Open Site Plan
- University of Calgary
- UK Met Office

The OGC CDB standard is based on and derived from an industry developed and maintained specification, which has been approved and published as OGC Document 15-003: OGC Common DataBase Volume 1 Main Body. An extensive listing of contributors to the legacy industry-led CDB specification is at Chapter 11, pp 475-476 in that OGC Best Practices Document ([https://portal.opengeospatial.org/files/?artifact\\_id=61935](https://portal.opengeospatial.org/files/?artifact_id=61935)).

## **v. Submitters**

All questions regarding this submission should be directed to the editor or the submitters:

| Name         | Affiliation            |
|--------------|------------------------|
| Carl Reed    | Carl Reed & Associates |
| David Graham | CAE Inc.               |

# Chapter 1. Scope

This informative CDB document provides a list and description of the instance-level attribution fields held in Navigation *Dataset Instance Attribute* files. This content was originally in Annexes H and I, Volume 2 CDB Best Practice.

For ease of editing and review, the standard has been separated into 12 Volumes and a schema repository.

For ease of editing and review, the standard has been separated into 16 Volumes, one being a schema repository.

- Volume 0: OGC CDB Companion Primer for the CDB standard (Best Practice).
- Volume 1: OGC CDB Core Standard: Model and Physical Data Store Structure. The main body (core) of the CDB standard (Normative).
- Volume 2: OGC CDB Core Model and Physical Structure Annexes (Best Practice).
- Volume 3: OGC CDB Terms and Definitions (Normative).
- Volume 4: OGC CDB Rules for Encoding CDB Vector Data using Shapefiles (Best Practice).
- Volume 5: OGC CDB Radar Cross Section (RCS) Models (Best Practice).
- Volume 6: OGC CDB Rules for Encoding CDB Models using OpenFlight (Best Practice).
- Volume 7: OGC CDB Data Model Guidance (Best Practice).
- Volume 8: OGC CDB Spatial Reference System Guidance (Best Practice).
- Volume 9: OGC CDB Schema Package: <http://schemas.opengis.net/cdb/> provides the normative schemas for key features types required in the synthetic modelling environment. Essentially, these schemas are designed to enable semantic interoperability within the simulation context (Normative).
- Volume 10: OGC CDB Implementation Guidance (Best Practice).
- Volume 11: OGC CDB Core Standard Conceptual Model (Normative).
- Volume 12: OGC CDB Navaids Attribution and Navaids Attribution Enumeration Values (Best Practice).
- Volume 13: OGC CDB Rules for Encoding CDB Vector Data using GeoPackage (Normative, Optional Extension).
- Volume 14: OGC CDB Guidance on Conversion of CDB Shapefiles into CDB GeoPackages (Best Practice).
- Volume 15: OGC CDB Optional Multi-Spectral Imagery Extension (Normative).

# **Chapter 2. Conformance**

Not Applicable

# **Chapter 3. References**

The following normative documents contain provisions that, through reference in this text, constitute provisions of this document. For dated references, subsequent amendments to, or revisions of, any of these publications do not apply. For undated references, the latest edition of the normative document referred to applies.

# **Chapter 4. Terms and Definitions**

This document uses the terms defined in Sub-clause 5.3 of [OGC 06-121r8], which is based on the ISO/IEC Directives, Part 2, Rules for the structure and drafting of International Standards. In particular, the word “shall” (not “must”) is the verb form used to indicate a requirement to be strictly followed to conform to this standard.

# **Chapter 5. Conventions**

This section provides details and examples for any conventions used in the document. Examples of conventions are symbols, abbreviations, use of XML schema, or special notes regarding how to read the document.

## **5.1. Identifiers**

No requirements.

# Chapter 6. Navaids Attribution Tables

This informative document provides a list and description of the instance-level attribution fields held in Navigation *Dataset Instance Attribute* files. The attribute name is limited to a maximum of 10 characters.

The Logical data type in column 2 of the following tables refers to the dBASE III Logical data type. A true value is defined as one of the letters T, t, Y, and y; while the false value is defined as F, f, N, and n.

## 6.1. Airport

| Attribute Name | Data Type         | Range    | Unit | Key  | Description  |
|----------------|-------------------|----------|------|------|--|
| StoraNumbe     | Uint64            | -        | -    | 2101 | Storage number.  |
| AHGT           | Logical           | 1        | -    |      | Absolute Height above surface level Flag. Always true.                     |
| AlterNam       | String            | 50 chars | -    |      | Alternate name other than the official name that can be used occasionally. |
| AsCoStNumb     | Uint64            | -        | -    |      | Associated Comms record storage number                                     |
| BeacoAvail     | Logical           | Boolean  | -    |      | Indicates if a rotating beacon is present.                                 |
| City           | String            | 50 chars | -    |      | Airport city name.   |
| CivMilTyp      | CivilMilitaryType | 0-6      | -    |      | Airport usage type (civil, military, etc.)                                 |
| ClearStatu     | ClearanceStatus   | 0-3      | -    |      | Clearance status.  |
| Country        | CountryEntry      | 0-336    | -    | 2116 | Country where the airport is located.                                      |

| <b>Attribute Name</b> | <b>Data Type</b> | <b>Range</b> | <b>Unit</b> | <b>Key</b> | <b>Description</b>   |
|-----------------------|------------------|--------------|-------------|------------|--|
| DayliTim              | Float32          | +/-24        | Hrs         |            | Difference to Zulu time based on the daylight saving time.             |
| DayTimFram            | String           | 100 chars    | -           |            | Timeframe when daylight saving time is observed by a country.          |
| FlipPage              | String           | 75 chars     | -           |            | Related pages for that airport in the companion FLIP.                  |
| FuelType              | String           | memo         | -           |            | Fuel type available.   |
| HydElePres            | Logical          | Boolean      | -           |            | Indication of the presence of a hydrographic element near the airport. |
| IataCode              | String           | 6 chars      | -           |            | Airport IATA designator.   |
| IcaoCode              | String           | 4 chars      | -           | 2103       | Airport ICAO area code.  |
| Ident                 | String           | 6 chars      | -           | 2102       | Airport ICAO ident.  |
| IfrCapab              | Logical          | Boolean      | -           |            | Indicates if the airport has published IFR approaches.                 |
| IslanGrou             | String           | 50 chars     | -           |            | Airport associated with islands or group of islands.                   |
| Jasu                  | String           | 100 chars    | -           |            | Type of Jet Aircraft Starting Units (JASU) available.                  |
| LonRunLeng            | Uint32           | -            | Ft          |            | Length of the longest runway of the airport.                           |

| <b>Attribute Name</b> | <b>Data Type</b>       | <b>Range</b> | <b>Unit</b> | <b>Key</b> | <b>Description</b>  |
|-----------------------|------------------------|--------------|-------------|------------|---|
| LonRunSurf            | PavementType           | 0-3          | -           |            | Surface type of the longest runway.   |
| MagTruIndi            | MagneticTrueIndication | 0-6          | -           |            | Indicates if the details and procedures are given relative to Magnetic or True North. |
| MagneVaria            | Float32                | +/-180       | Deg         |            | Magnetic variation.   |
| MgrsPosit             | String                 | 20 chars     | -           |            | MGRS position given using the UTM or the UPS grid.                                    |
| Name                  | String                 | 100 chars    | -           |            | Official name.  |
| NavIcaCod             | String                 | 4 chars      | -           |            | Recommended navaid ICAO code.   |
| Navailden             | String                 | 6 chars      | -           |            | Recommended navaid ident.   |
| Notam                 | NotamSystem            | 0-4          | -           |            | Notam service.  |
| OilType               | String                 | 75 chars     | -           |            | Type of oil available.  |
| OperaAgenc            | String                 | 255 chars    | -           |            | Primary operating agency.   |
| OperaHour             | OperatingHours         | 0-4          | -           |            | Operating hours of the airport.   |
| Point1                | GeoCoordinate          | x,y,z        | -           |            | Position (latitude, longitude, altitude) of the NavObject.                            |
| Remark                | String                 | memo         | -           |            | Essential remarks for terminal procedures.  |
| ServiRemar            | String                 | Memo         | -           |            | Service remarks for airport.  |
| SpeedLimit            | Uint32                 | -            | Kts         |            | Speed limit in knots.   |

| <b>Attribute Name</b> | <b>Data Type</b> | <b>Range</b> | <b>Unit</b> | <b>Key</b> | <b>Description</b>  |
|-----------------------|------------------|--------------|-------------|------------|---|
| SpeLimAlti            | Sint32           | -            | Ft          |            | Altitude below where speed limits may be imposed  |
| StateName             | StateEntry       | 0-51         | -           |            | State or province where the airport is located.   |
| SupFluTyp             | String           | 50 chars     | -           |            | Type of available fluids/system/oxygen/nitrogen .   |
| TerraImpac            | Logical          | Boolean      | -           |            | Indicates a terrain impact on the airport.  |
| Timezone              | Float32          | +/-24        | Hrs         |            | Difference to Zulu time.  |
| TransAltit            | Sint32           | -            | Ft          |            | Upper altitude limit for which the vertical position of an A/C is controlled by reference to altitudes (MSL). |
| TransLeve             | Sint32           | -            | Ft          |            | Lowest flight level available to use above the transition altitude.   |

## 6.2. AirRefueling

| <b>Attribute Name</b> | <b>Data type</b> | <b>Range</b> | <b>Unit</b> | <b>Key</b> | <b>Description</b>                                     |
|-----------------------|------------------|--------------|-------------|------------|--|
| StoraNumbe            | Uint64           | -            | -           | 2101       | Storage number.  |
| AHGT                  | Logical          | 1            | -           |            | Absolute Height above surface level Flag. Always true. |

| <b>Attribute Name</b> | <b>Data type</b>             | <b>Range</b> | <b>Unit</b> | <b>Key</b> | <b>Description</b>   |

| Frequency4            | Uint64                        | -            | Hz          |            | Center frequency 4   |
| Frequency5            | Uint64                        | -            | Hz          |            | Center frequency 5   |
| FreDirRest            | FrequencyDirectionRestriction | 0-3          | -           |            | Direction in which the specified frequency applies                           |
| FreDirRes1            | FrequencyDirectionRestriction | 0-3          | -           |            | Direction in which the specified frequency applies                           |
| FreDirRes2            | FrequencyDirectionRestriction | 0-3          | -           |            | Direction in which the specified frequency applies                           |

| <b>Attribute Name</b> | <b>Data type</b>              | <b>Range</b> | <b>Unit</b> | <b>Key</b> | <b>Description</b>                                 |
|-----------------------|-------------------------------|--------------|-------------|------------|--|
| FreDirRes3            | FrequencyDirectionRestriction | 0-3          | -           |            | Direction in which the specified frequency applies |
| FreDirRes4            | FrequencyDirectionRestriction | 0-3          | -           |            | Direction in which the specified frequency applies |
| IcaoCode              | String                        | 4 chars      | -           |            | ICAO code  |
| Point1                | GeoCoordinate                 | x,y,z        | -           |            | Reference Position (longitude, latitude, altitude) |
| RefPoiTyp             | RefuelingPoint Type           | 0-7          | -           |            | Type of refueling point                            |

## 6.4. AirRefuelingFootnote

| <b>Attribute Name</b> | <b>Data type</b> | <b>Range</b> | <b>Unit</b> | <b>Key</b> | <b>Description</b>                                     |
|-----------------------|------------------|--------------|-------------|------------|--|
| StoraNumbe            | Uint64           | -            | -           | 2101       | Storage number.  |
| AHGT                  | Logical          | 1            | -           |            | Absolute Height above surface level Flag. Always true. |
| AiReOpIden            | String           | 20 chars     | -           | 2108       | Air refueling operation identifier                     |
| AiReStNumb            | Uint64           | -            | -           |            | Associated air refueling record storage number         |
| Country               | CountryEntry     | 0-336        | -           |            | Country where the refueling operation is located       |

| Attribute Name | Data type          | Range   | Unit | Key | Description  |
|----------------|--------------------|---------|------|-----|--|
| Direction      | RefuelingDirection | 0-8     | -    |     | Predominant direction of the refueling track or anchor at the point of entry |
| Footnote       | String             | memo    | -    |     | Footnote   |
| IcaoCode       | String             | 4 chars | -    |     | ICAO code  |
| Point1         | GeoCoordinate      | x,y,z   | -    |     | Reference Position (longitude, latitude, altitude)                           |

## 6.5. AirRefuelingPoint

| Attribute Name | Data type    | Range    | Unit | Key  | Description  |
|----------------|--------------|----------|------|------|--|
| StoraNumbe     | Uint64       | -        | -    | 2101 | Storage number.  |
| AHGT           | Logical      | 1        | -    |      | Absolute Height above surface level Flag. Always true. |
| AiReOpIden     | String       | 20 chars | -    | 2108 | Air refueling operation identifier                     |
| AiReStNumb     | Uint64       | -        | -    |      | Associated air refueling record storage number         |
| Bearing        | Uint32       | 0-359    | Deg  |      | Bearing TO navaid (brg FROM navaid if DME)             |
| CoWiNaFla      | Logical      | Boolean  | -    |      | Indicates if point is collocated with a navaid         |
| Country        | CountryEntry | 0-336    | -    |      | Country where the refueling point is located           |

| Attribute Name | Data type           | Range   | Unit | Key  | Description  |
|----------------|---------------------|---------|------|------|--|
| Direction      | RefuelingDirection  | 0-8     | -    |      | Predominant direction of the refueling track or anchor at the point of entry |
| Distance       | Uint32              | -       | Nm   |      | Distance to navaid   |
| IcaoCode       | String              | 4 chars | -    |      | ICAO code  |
| Ident          | String              | 6 chars | -    | 2102 | Refueling point identifier   |
| NavaiCount     | CountryEntry        | 0-336   | -    |      | Navaid country   |
| NavaiIden      | String              | 6 chars | -    |      | Navaid identifier  |
| NavKeyCod      | Uint32              | -       | -    |      | Navaid key code  |
| NavaidType     | NavaidType          | 0-15    | -    |      | Navaid type  |
| Point1         | GeoCoordinate       | x,y,z   | -    |      | Position (longitude, latitude, altitude) of refueling point                  |
| SequeNumbe     | Uint32              | -       | -    | 2115 | Refueling point sequence number  |
| Type           | RefuelingPoint Type | 0-7     | -    |      | Type of refueling point  |

## 6.6. AirRefuelingSegment

| Attribute Name | Data type | Range    | Unit | Key  | Description  |
|----------------|-----------|----------|------|------|--|
| StoraNumbe     | Uint64    | -        | -    | 2101 | Storage number.  |
| AHGT           | Logical   | 1        | -    |      | Absolute Height above surface level Flag. Always true. |
| AiReOpIden     | String    | 20 chars | -    | 2108 | Air refueling operation identifier                     |

| <b>Attribute Name</b> | <b>Data type</b>     | <b>Range</b> | <b>Unit</b> | <b>Key</b> | <b>Description</b>   |
|-----------------------|----------------------|--------------|-------------|------------|--|
| AiReStNumb            | Uint64               | -            | -           |            | Associated air refueling record storage number                               |
| Point2                | GeoCoordinate        | x,y,z        | -           |            | Arc origin position (longitude, latitude, altitude)                          |
| ArcSegDeri            | ArcSegmentDerivation | 0-3          | -           |            | Indicates how the arc segment is defined                                     |
| Bearing1              | Float32              | +/-180       | Deg         |            | Bearing 1 from center coordinates or navaid                                  |

## 6.7. Airspace Boundary

| <b>Attribute Name</b> | <b>Data Type</b> | <b>Range</b> | <b>Unit</b> | <b>Key</b> | <b>Description</b>   |
|-----------------------|------------------|--------------|-------------|------------|--|
| StoraNumbe            | Uint64           | -            | -           | 2101       | Storage number.  |
| AHGT                  | Logical          | 1            | -           |            | Absolute Height above surface level Flag. Always true.       |
| AirwaLeve             | AirwayLevel      | 0-3          | -           |            | Airspace structure in which boundary is effective (high/low) |
| Class                 | String           | 2 chars      | -           |            | Airspace boundary class                                      |
| ClaExcFla             | Logical          | Boolean      | -           |            | Flag indicating exceptions to the airspace class             |
| ClaExcRema            | String           | memo         | -           |            | Provides the details of the exception in the airspace        |

| <b>Attribute Name</b> | <b>Data Type</b>  | <b>Range</b> | <b>Unit</b> | <b>Key</b> | <b>Description</b>  |
|-----------------------|-------------------|--------------|-------------|------------|---|
| ComCalSig             | String            | 40 chars     | -           | 2111       | Call sign of the communications facilities                  |
| ContrAutho            | String            | 60 chars     | -           |            | Office responsible for air traffic within airspace          |
| Country               | CountryEntry      | 0-336        | -           | 2116       | Country where the boundary is located                       |
| Frequency             | Uint64            | -            | Hz          |            | Frequency for communicating with identified facility        |
| Frequenc1             | Uint64            | -            | Hz          |            | Frequency 2 used for communicating with identified facility |
| IcaoCode              | String            | 4 chars      | -           |            | ICAO code of the airspace boundary                          |
| Ident                 | String            | 6 chars      | -           | 2102       | ICAO ident of airspace boundary                             |
| LowEffAlti            | Sint32            | -            | Ft          |            | Lower vertical limit of the given airspace                  |
| LoEfAlRefe            | AltitudeReference | 0-4          | -           |            | Lower effective altitude reference                          |
| LowRvsAlti            | Sint32            | -            | Ft          |            | Lower vertical limit of the given RVSM airspace             |
| Name                  | String            | 50 chars     | -           |            | Official name of the airspace boundary                      |
| Point1                | GeoCoordinate     | x,y,z        | -           |            | Reference Position (longitude, latitude, altitude)          |

| Attribute Name | Data Type            | Range | Unit | Key | Description   |
|----------------|----------------------|-------|------|-----|---|
| ReqNavPerf     | Float32              | -     | Nm   |     | Required performance accuracy necessary for operation within airspace |
| Type           | AirspaceBoundaryType | 0-14  | -    |     | Airspace boundary type  |
| UppEffAlti     | Sint32               | -     | Ft   |     | Upper vertical limit of the given airspace                            |
| UpEfAlRef      | AltitudeReference    | 0-4   | -    |     | Upper effective altitude reference                                    |
| UppRvsAlti     | Sint32               | -     | Ft   |     | Upper vertical limit of the given RVSM airspace                       |

## 6.8. AirwayRestriction

| Attribute Name | Data Type | Range   | Unit | Key  | Description  |
|----------------|-----------|---------|------|------|--|
| StoraNumber    | Uint64    | -       | -    | 2101 | Storage number.  |
| BloAltTo       | Logical   | Boolean | -    |      | Consider restriction altitude 1 to 2 as a restricted range |
| BloAltTo1      | Logical   | Boolean | -    |      | Consider restriction altitude 2 to 3 as a restricted range |
| BloAltTo2      | Logical   | Boolean | -    |      | Consider restriction altitude 3 to 4 as a restricted range |
| BloAltTo3      | Logical   | Boolean | -    |      | Consider restriction altitude 4 to 5 as a restricted range |

| <b>Attribute Name</b> | <b>Data Type</b>   | <b>Range</b> | <b>Unit</b> | <b>Key</b> | <b>Description</b>   |
|-----------------------|--------------------|--------------|-------------|------------|--|
| BloAltTo4             | Logical            | Boolean      | -           |            | Consider restriction altitude 5 to 6 as a restricted range |
| BloAltTo5             | Logical            | Boolean      | -           |            | Consider restriction altitude 6 to 7 as a restricted range |
| BlockAltit            | Logical            | Boolean      | -           |            | Consider restriction altitude 7 as a restricted altitude   |
| Country               | CountryEntry       | 0-336        | -           | 2116       | Country where the start fix point is located               |
| CruisTabl             | CruiseTable        | 0-4          | -           |            | Cruise table indicator                                     |
| EndDate               | String             | 12 chars     | -           |            | End date   |
| EnFiIcCod             | String             | 4 chars      | -           |            | ICAO code of end fix point                                 |
| EndFixIden            | String             | 6 chars      | -           |            | End fix point identifier                                   |
| ExcluIndic            | ExclusionIndicator | 0-4          | -           |            | Altitudes to be excluded                                   |
| OpeEndDay             | DayOfWeek          | 0-7          | -           |            | Time of operation end day                                  |
| OpeEndDay1            | DayOfWeek          | 0-7          | -           |            | Time of operation end day                                  |
| OpeEndDay2            | DayOfWeek          | 0-7          | -           |            | Time of operation end day                                  |
| OpeEndDay3            | DayOfWeek          | 0-7          | -           |            | Time of operation end day                                  |

| CaEWeCeili            | Float32          | -            | m           |            | Height equal to or greater than decision height or minimum descent altitude above airport or heliport elevation |
| Country               | CountryEntry     | 0-336        | -           | 2116       | Country associated with terminal procedure minima data  |
| IcaoCode              | String           | 4 chars      | -           |            | Terminal procedure ICAO code  |
| Ident                 | String           | 40 chars     | -           | 2102       | Terminal procedure identifier   |

| Attribute Name | Data Type | Range | Unit | Key | Description   |
|----------------|-----------|-------|------|-----|---|
| RouteType      | RouteType | 0-4   | -    |     | Terminal procedure route type                                 |
| Remark         | String    | memo  | -    |     | Remarks give conditions affecting published approach minimums |

## 6.44. VfrRoute

| Attribute Name | Data Type     | Range   | Unit | Key  | Description  |
|----------------|---------------|---------|------|------|--|
| StoraNumbe     | Uint64        | -       | -    | 2101 | Storage number.  |
| AHGT           | Logical       | 1       | -    |      | Absolute Height above surface level Flag. Always true. |
| AirIcaCod      | String        | 4 chars | -    |      | ICAO code of the associated airport/heliport           |
| AirpoIden      | String        | 6 chars | -    | 2111 | Identifier of the associated airport/heliport          |
| Point1         | GeoCoordinate | x,y,z   | -    |      | Position (longitude, latitude, altitude) of airport    |
| AirStoNumb     | Uint64        | -       | -    |      | Storage number of the associated airport/heliport      |
| Country        | CountryEntry  | 0-336   | -    | 2116 | Country where the airport/heliport is located          |

| <b>Attribute Name</b> | <b>Data Type</b> | <b>Range</b> | <b>Unit</b> | <b>Key</b> | <b>Description</b>  |
|-----------------------|------------------|--------------|-------------|------------|---|
| Remark                | String           | memo         | -           |            | Essential information pertaining to part or to all route procedures at the airport/heliport |
| RouteIdent            | String           | 6 chars      | -           | 2102       | Route identifier  |
| RouteName             | String           | 40 chars     | -           |            | Route name  |

## 6.45. VfrRouteSegment

| <b>Attribute Name</b> | <b>Data Type</b> | <b>Range</b> | <b>Unit</b> | <b>Key</b> | <b>Description</b>                                     |
|-----------------------|------------------|--------------|-------------|------------|--|
| StoraNumbe            | Uint64           | -            | -           | 2101       | Storage number.  |
| AHGT                  | Logical          | 1            | -           |            | Absolute Height above surface level Flag. Always true. |
| AirIcaCod             | String           | 4 chars      | -           | 2103       | ICAO code of the associated airport/heliport           |
| AirpoIden             | String           | 6 chars      | -           | 2111       | Identifier of the associated airport/heliport          |
| AirStoNumb            | Uint64           | -            | -           |            | Storage number of the associated airport/heliport      |
| Altitude              | Uint32           |              | Ft          |            | Reference altitude [above sea level]                   |
| Country               | CountryEntry     | 0-336        | -           | 2116       | Country where the airport/heliport is located          |

| <b>Attribute Name</b> | <b>Data Type</b>       | <b>Range</b> | <b>Unit</b> | <b>Key</b> | <b>Description</b>  |
|-----------------------|------------------------|--------------|-------------|------------|---|
| Course                | Float32                | +/-180       | Deg         |            | Inbound course to the point/checkpoint  |
| CoursRefer            | MagneticTrueIndication | 0-6          | -           |            | Course reference (magnetic/true)  |
| Point2                | GeoCoordinate          | x,y,z        | -           |            | Position (longitude, latitude, altitude)<br>0.5nm, at 90 degree angle to heading, to left of checkpoint |
| MgrsPositi            | String                 | 20 chars     | -           |            | MGRS position given using the UTM or the UPS grid   |
| PathType              | PathType               | 0-6          | -           |            | Defines how the route is used (eg: arrival, departure, etc.)  |
| PointName             | String                 | 25 chars     | -           |            | Official name of point/checkpoint   |
| PointDescr            | String                 | 40 chars     | -           |            | Landmark, graphical description of point/checkpoint   |
| PoiRepTyp             | PointReportingType     | 0-2          | -           |            | Indicates if point is compulsory for graphic presentation of the route                                  |
| Point1                | GeoCoordinate          | x,y,z        | -           |            | Position (longitude, latitude, altitude) of point/checkpoint  |

| <b>Attribute Name</b> | <b>Data Type</b>           | <b>Range</b> | <b>Unit</b> | <b>Key</b> | <b>Description</b>   |
|-----------------------|----------------------------|--------------|-------------|------------|--|
| Point3                | GeoCoordinate              | x,y,z        | -           |            | Position (longitude, latitude, altitude)<br>0.5nm, at 90 degree angle to heading, to right of checkpoint |
| RouteIdent            | String                     | 6 chars      | -           | 2102       | Route identifier   |
| RouteName             | String                     | 40 chars     | -           |            | Route name   |
| SegAltDesc            | SegmentAltitudeDescription | 0-5          | -           |            | Defines how the given altitude applies to the segment  |
| SegmeNam              | String                     | 25 chars     | -           |            | Official segment name  |
| SegmeNumbe            | Uint32                     | -            | -           | 2115       | Defines relative position of segment in total VFR route segment  |
| SegTurDire            | PathTurnDirection          | 0-2          | -           |            | Direction in which course turns are to be made   |
| SegmeTyp              | SegmentType                | 0-3          | -           |            | Indicates if segment is a starting, next, or ending segment  |
| SOEAAFla              | Logical                    | Boolean      | -           |            | Flag indicating whether or not the segment starts or ends at an airport/heliport                         |
| VfRoStNumb            | Uint64                     | -            | -           |            | Storage number of the associated VFR route record  |

## 6.46. Waypoint

| Attribute Name | Data Type              | Range   | Unit | Key  | Description  |
|----------------|------------------------|---------|------|------|--|
| StoraNumbe     | Uint64                 | -       | -    | 2101 | Storage number.  |
| AHGT           | Logical                | 1       | -    |      | Absolute Height above surface level Flag. Always true. |
| AirIcaCod      | String                 | 4 chars | -    |      | ICAO code of the associated airport.                   |
| AirpoIden      | String                 | 6 chars | -    |      | Ident of the associated airport.                       |
| AirStoNumb     | Uint64                 | -       | -    |      | Storage number of the associated airport.              |
| Bearing        | Float32                | +/-180  | Deg  |      | Bearing from navaid to waypoint                        |
| BeariRefer     | MagneticTrueIndication | 0-6     | -    |      | Bearing reference (magnetic, true, or 'grid')          |
| ColloNavai     | Logical                | Boolean | -    |      | Waypoint collocated with a navaid flag                 |
| Country        | CountryEntry           | 0-336   | -    | 2116 | Country where the waypoint is located                  |
| Distance       | Float32                | -       | Nm   |      | Distance from navaid to waypoint                       |
| DynMagVari     | Float32                | +/-180  | Deg  |      | Dynamic magnetic variation                             |

# Chapter 7. Navaids Attribution Enumeration Values

This section describes the attributes specific to each NAV category whose values are enumerated in accordance to this appendix.

| Enumeration Name | Enumerator Description                                 | Values |
|------------------|--|--------|
| BoxRegionType    |  |        |
|                  | Remained Region  | 0      |
|                  | Added Region   | 1      |
|                  | Removed Region   | 2      |
| AircraftCategory |  |        |
|                  | All aircrafts  | 0      |
|                  | Jets only  | 1      |
|                  | Turbo props only                                       | 2      |
|                  | Other  | 3      |
|                  | Not Defined  | 4      |
| AircraftGroup    |  |        |
|                  | All Aircraft   | 0      |
|                  | All Aircraft, Cruise speed 250 kts or less             | 1      |
|                  | Non-Jet and Turbo Prop                                 | 2      |
|                  | Multi-Engine Props Only                                | 3      |
|                  | Jets & Turbo Props/Spec., Cruise Spd 190kts or greater | 4      |
|                  | Helicopter Only  | 5      |
|                  | Jet Power  | 6      |
|                  | Turbo-Prop/Special, Cruise Speed 190 kts or greater    | 7      |
|                  | Non-Jet, Non-Turbo Prop                                | 8      |
|                  | Non-Jet, Cruise Speed 190 kts or greater               | 9      |
|                  | Non-Jet, Cruise Speed 189 kts or less                  | 10     |
|                  | Aircraft as defined in a Continuation Record Note      | 11     |
|                  | Single Engine  | 12     |
|                  | Twin Engine  | 13     |
|                  | Non Turbo Jets   | 14     |

| <b>Enumeration Name</b> | <b>Enumerator Description</b>            | <b>Values</b> |
|-------------------------|--|---------------|
|                         | Non Jets                                 | 15            |
|                         | Props                                    | 16            |
|                         | Turbo Props                              | 17            |
|                         | Turbo Jets                               | 18            |
|                         | Water Turbo Jets                         | 19            |
|                         | Water Turbo Props                        | 20            |
|                         | Not defined                              | 21            |
